Sign Permit Application

Please enclose the following documents and information with your application:

- Location plan in the form of a site plan and elevation plan, to scale, illustrating proposed sign as it will appear on the project.
- Sign dimensions and letters.
- Sign materials.
- Method of lighting and construction and/or installation.
- One copy of color samples or colored rendering to illustrate colors of sign. Photographs can be submitted.
- Dimensions of the building.

Important considerations:

- Pylon or pole signs have a maximum height allowance of 25 feet (LDR Section 15.765)
- All signs in a commercially zoned district have a 5 feet setback from the property line (LDR Section 15.765).
- No sign shall encroach upon or extend over any public right-of-way (LDR Section 15.765.8 (e)(1)).
- No sign shall be permitted which employs motion picture projection or has moving parts or gives the illusion of motion (LDR Section 15.765.5 (b)(2)).
- Non motion LED signs will require a permit.

Application for permit shall be accompanied by such drawings and information necessary to fully acquaint the Director with the location, construction, weight, materials, wind stress calculations, method of securing and manner of illuminating such sign, and the drawings shall bear the certification of an approval of a duly licensed structural design engineer registered in the State of Florida. Permission of the owner of the property on which the sign is to be located shall be indicated either by letter or by signature on the drawings, and such letter or signed drawing shall be filed as may be required by the Director. Proof of public liability insurance coverage may be required by the Director (LDR Section 15.765.7 (c)(1)).
