

THE CALLAWAY Community Redevelopment Agency (“CRA”) was established in 2007 pursuant to Chapter 163, Part III, Florida Statutes to engage in activities and programs that prevent and eliminate slum and blighted conditions with the community.

TAX INCREMENT FINANCING (TIF) AND CRA REVENUE TRENDS

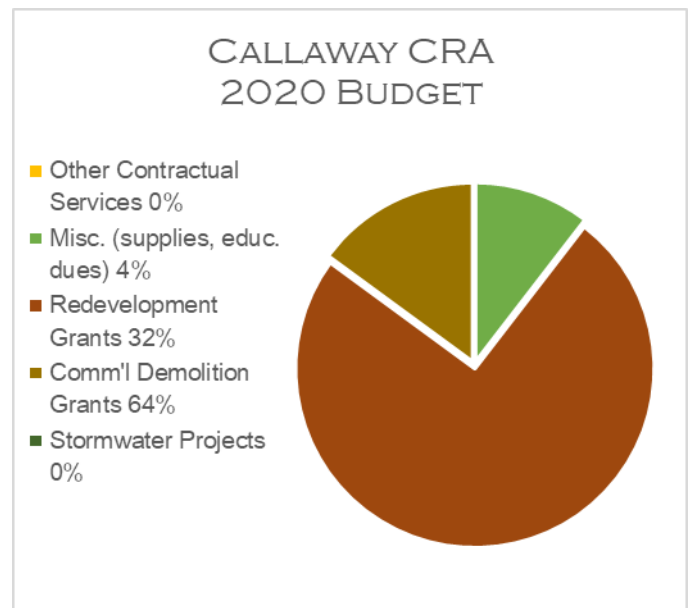

The primary revenue source for the Callaway Community Redevelopment Agency is tax increment financing (TIF). It is used for redevelopment activities and is often used to leverage public funds to promote private sector activity in the CRA area. The market and taxable values of real property located in the redevelopment area substantially impact the amount of TIF revenue deposited to the

CRA Trust Fund annually. As real property values begin to increase, there will be an increase in TIF revenue.

CRA ACTIVITIES

All public redevelopment activities are authorized and funded by the CRA in accordance with the Community Redevelopment Plan. Community redevelopment activities in Callaway during Fiscal Year 2020 focused on stormwater infrastructure improvements, the commercial corridors, and park improvements.

Deficient and aging stormwater infrastructure is a major source of concern in the Callaway CRA. During 2020, the Agency was in a planning stage to leverage TIF revenues with state grants opportunities and other funding sources.

Stormwater infrastructure improvements have been the top priority for the Agency since its establishment. Façade improvement and demolition grants were available in FY2020 to assist commercial property and business owners located along the major commercial corridors.

CRA BALANCE SHEET FY2020		
Assets:		
Cash and cash equivalents	\$	163,076

Net Change in Fund Balance		<2,362>
Fund Balance-Beginning of YR. (restated)	\$	165,438
Total Liabilities and Fund Balance	\$	163,076

FUTURE ACTIVITIES

Moving forward, funding the construction of planned improvements to the stormwater system in the redevelopment area will continue to be the highest priority for the CRA. The Callaway Community Redevelopment Plan states there “*is a need for significant re-construction, upgrading and expansion of the stormwater management system within the CRA...*” The CRA will seek to make other types of public improvements in the near future, such as sidewalk construction and right-of-way beautification as well as implementing economic/business development strategies. It will be important for the CRA to prioritize redevelopment activities, couple TIF revenues with state and federal grants, and leverage public funds with private investments.
